

It's all solid,
low maintenance,
prefinished and ready
to install
hardwood flooring.

Benefits of Hardwood

Wood flooring is timeless.

It enhances the warmth of any home and
complements the decor of any room.

Like a fine piece of furniture, wood flooring
increases in value and becomes more beautiful
with time. In a national survey, 90 percent of real
estate agents said that houses with wood flooring
sell faster and for more money.

Wood is a natural resource, renewable and
recyclable. Buildings, barns, ships and other
structures made of wood often find a second life
in wood flooring, cabinets, walls and ceilings. And
leading allergists agree that wood floors are the
perfect choice for a healthy home.
