

Oak

Oak is brown in color, but can have a grayish cast. The grain is similar to red oak with more burrs and swirls. It is harder and more durable.

Pyinkado

Pyinkado heartwood is golden to reddish brown with darker streaks, often locally speckled with dark spots. The sapwood is a pale reddish white. The grain can be straight, interlocked, or frequently wavy. The texture is moderately fine.

Teak

Teak is strong. It is naturally oily, which makes it a very good material. We say that it is very durable material. Teak is highly resistant to moisture, fire, acid and alkalis.

Kempas

Kempas is a coarse grained, very hard, pink to reddish color wood, with medium graining, that is widely used for flooring in the Far East.

Merbau

Merbau grain and growth ring figure together with its dark red-brown colour gives it a very attractive appearance.

Hard Wood Floor

Galliant Floor®

Hard Wood Floor

We are one of the factory outlet of pre-finished and unfinished hardwood flooring in the industry. All our flooring is first-quality, graded to industry specifications and standard flooring lengths.

Visit one of our reseller or call to order. We ship anywhere in the world. Samples are available.
